DOOR SPRINGS

SIMPLEX

ADJUSTABLE

For Screen and Storm Doors

Tension can be adjusted by turning threaded shaft in or out. This adjustment makes it possible to maintain proper tension, and when a change is made from screen to storm door, the tension can be changed to meet the requirements of the lighter or heavier door. Will serve the purpose of any spring from Nos. 3 to 6. Fine quality No. 6 premier, tempered to assure satisfactory results.

SASH LOCK DEMONSTRATORS

AMEROCK WINTITE

Show customers unique locking and sealing action.

Clear-vue packaging adds extra sales appeal. Shiny clear plastic dome gives full view of hardware from top and all sides.

Locks securely, ends rattles and stops drafts.

Display 3 ways—hang up or bin display or use in display carton.

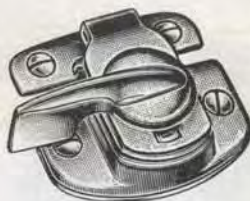

Nesting feature makes it easy to stack packages and keep display orderly.

Display includes free 8x5 1/4 x 3 1/2 inch demonstrator with mounted hardware and ten each wrought brass sash locks and sash lifts in polished brass finish.

INVISIBLE SASH BALANCES GRAND RAPIDS

These greatly improved balances are easily installed and are actually invisible regardless of window position.

They adjust automatically to different degrees of sash fit—practically eliminate wood chatter and always operate smoothly, quickly and easily.

Installation does not necessitate machining of frames, cutting in sash nor fastening blocks on jambs—requires only full-height round-bottom grooves in sash stiles in which balances are to be mounted.

Interchangeable—Same size fits both top and bottom sash.

Adjustable—Adjustments in most instances are not necessary. However, if slight adjustment is required it can be made without removing a single screw. Simply insert tension tool in hex head tension axle at top and adjust as desired.

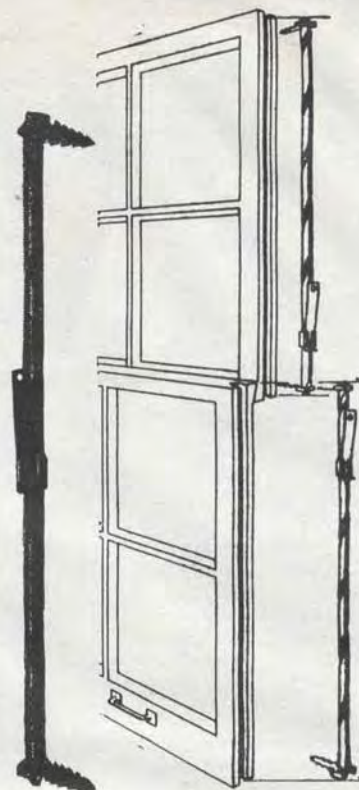

Balance consists of a helical coil spring within a rotative spiral tube operating through a solid brass bearing. Special electro-galvanized finish resists atmospheric corrosion.

IMPORTANT—

Note that number is same as glass height.

Specifications are based on standard $1\frac{3}{8}$ inch Western frames. If any other used, give sash opening sizes. Finished groove (after fitting) must be full $\frac{5}{8}$ inch wide by $\frac{3}{4}$ inch deep. This means the groove before fitting should be $\frac{13}{16}$ to $\frac{1}{2}$ inch deep.

All Numbers will Fit Sash 1 ft. 4 ins. to 4 ft. 4 ins. Wide—Glass 12 to 48 ins. Wide

UNIVERSAL CATCHES

WIN-DOR SNUGGER

Closes Doors and Keeps Them Closed

Fits any door. It may be attached to the top or bottom of the door, at the side. Vertically or on the top or under-side of a cabinet shelf.

Has a finger actuated by a spring with a 4-lb. pull which extends out 1/2 inch beyond the edge of the door stop and literally grabs the door to pull it shut tightly and snugly.

Primarily designed for small doors, it can be used efficiently on any door up to 1 1/8 inches thick.

CADMIUM PLATED

Size 2³/₄x3/4x2³/₁₆ inches.

Each
L2102F (47D) D4C5★..... \$0.65
One on card, with screws.
Twelve cards in ctn. Wt. ctn. 3 lbs.

FOR LIGHT WINDOWS

Size 3³/₁₆x1¹³/₁₆ inches.

Each
L2103F (48D) D5C8..... \$0.95
One on card, with screws.
Twelve cards in box. Wt. box 4 1/2 lbs.

TOUCH CATCHES

LINREAD-TUTCH LATCH

Opens cabinet automatically with a gentle touch of the finger, arm or elbow. Assures positive latching action. Will operate in any position.

Cadmium plated steel case 3x5/8x3/4 inches. Flange has elongated holes for easy mounting. Well made with spring mechanism enclosed.

Complete with catch strike, screws and instruction.

Each
L604F D4C2★..... \$0.70
Twelve in box. 144 in ctn. Wt. ctn. 26 lbs.

DOUBLE ROLLER CATCHES

MERIT

Spurs on strike locate position on door for quick installation. Long-wearing polyethylene rollers. Individual clear plastic packaging with screws. Bright nickel plated.

AMEROCK CABINET HINGES

CONCEALED HINGES

Both leaves concealed when door is closed. A small washer at joint provides for smooth operation. Heavy wrought steel construction. Easy to apply—no complicated fitting or mortising necessary. Stick template (which is included with every hinge) in desired position, cut out section marked on template, pull off remaining part of template. Elongated holes in door wing permit perfect adjustment. Can be used well with doors having rounded or beveled edges.
