ELECTRICAL POWER TOOLS and Shop Equipment

Sears, Roebuck and Co. The World's Largest Store
Here's QUALITY Backed by the

A Guarantee that Means 100% Protection to YOU!

COULD you ask us to write a more liberal guarantee? This guarantee is your assurance that you will receive the utmost satisfaction in any transaction you may have with us. Read it thoroughly, then go through this book carefully. Select the tools you need (taking advantage of our Time Payment Plan if you wish), then make out your order. Send it to us in the fullest confidence that you will receive better merchandise for less at Sears and that your transaction with us will be both pleasant and profitable to you.

High Quality Power Tools That Meet Every Need

We offer a selection of Power Tools that is unusually complete, and which will satisfy the needs of the home craftsman, the expert mechanic or the small pattern shop. The prices are outstandingly low. Look through this book carefully, compare the values, and you will readily understand why Sears, Roebuck and Co. have so many thousands of satisfied power tool customers.

Buy with Confidence at Sears

There is an added measure of confidence in buying your Power Tools and Bench Machinery from Sears. Our tools are made by factories whose products are approved everywhere for accuracy and high quality—factories of many years experience in the manufacture of tools of highest character and precision.

In order to maintain our position as one of America's leading retailers of highest grade tools, we assure ourselves that our products are LEADERS. Perfect honesty with every customer, combined with our policy of giving the greatest possible values, has been responsible for Sears commanding position in the high grade Power Tool Field.
WORLD’S LARGEST STORE!
Why Sears, Roebuck and Co. Can Sell for Less

Our customers have found by comparing prices that Sears prices on power tools are far lower than what others ask for similar high quality. There is nothing unusual about this, because we buy in enormous quantities. We use the most efficient merchandising methods, based on a record of almost 46 years successful experience. Our direct method of selling eliminates the profits of jobbers, salesmen and other middlemen.

QUALITY Comes First at SEARS!

Satisfied customers have always returned, and have influenced others to do their buying here. In this way, Sears have become the World’s Largest Store. Still growing, ever expanding, Sears today combine efficient distributing methods with enormous purchasing power to consistently establish the lowest prices on the market. Our prices on power tools reflect these economies to the fullest extent. And remember, no matter how great your saving, the quality of the merchandise you purchase is second to none.

BUY NOW!..... You May Have Almost a Year to Pay!

The modern way in buying—the pay-as-you-use way—a small amount down, a few dollars a month. That’s the sensible way to equip your shop—now! No need to wait for some far-off day when you feel you can spare the necessary cash. No need to delay the installation of much needed equipment. It’s easy to buy from Sears.

Pay only a small amount with your order—use the tools as you pay for them. The extra output which new tools make possible will undoubtedly be more than sufficient to take care of the monthly payments. If you feel handicapped because your old equipment is wearing out or obsolete, this is your big opportunity to modernize your shop with guaranteed tools of highest possible quality, and to make substantial savings as well.

30-Day Trial Offer!

Send us your order and our price for any tools in this catalog. Try them thoroughly. Give them every test. If after a month of service in your shop or home you are not completely satisfied, return these tools to us and we will refund your money, including any transportation charges you may have paid!

WE PAY THE POSTAGE ON ORDERS OF $200 OR MORE

As announced in our big General Catalog, we are introducing a new plan of paying postage on orders of $2.00 or more.

If the total value of the merchandise which you are ordering at any one time is $2.00 or more (without including items which are described as "Not Prepaid"), it will be shipped prepaid and in such cases, Sears, Roebuck and Co. will pay all the postage.

If you are ordering merchandise which can be sent by parcel post, where the total value of your order is less than $2.00, it will be necessary for you to include sufficient postage to cover actual mailing cost. Shipping weights are shown on all goods under $2.00 in selling price. Simply add the shipping weights of the articles you are purchasing and figure postage based on weight and zone.

As in past seasons we do not pay the postage on certain kinds of merchandise which you will find marked "Not Prepaid," even though these lines contain small mailable articles. We have found that most of our customers want to purchase these small articles in connection with a larger freight shipment. Naturally, our prices on these lines show the maximum saving which our low cost method of doing business allows. We invite you to compare our prices with others, and remember, we guarantee a saving on every purchase.

We do not Pay the Postage on Orders of Less than $2.00 or on Merchandise Marked "Not Prepaid."

ROSE TOOLS, INC.
ROSE TOOLS, INC.

Electricity

AMERICANS, being naturally ingenious, are not content to plod the weary paths of their ancestors. Their faculty of “cutting corners” and finding more modern ways of doing things has brought unquestioned leadership to this country. Because “let well enough alone” is no longer typical of the American’s way of thinking, this leadership will forever go unchallenged. And so it is that every passing year finds progressive Americans using new time and labor-saving machines and tools that do the “perfect” job better.

And not only in industry do we find this quick acceptance of modern methods. In small shops . . . in the home . . . on the farm . . . EVERY-WHERE harnessed electricity is replacing the slow, laborious methods which enslaved our forefathers to a life of drudgery. Indeed, one must now seek the remote spots of the country to get beyond reach of the many tasks which electricity can now perform.

BETTER WORK IS THE OFFSPRING OF BETTER TOOLS

Wherever things are made, beauty or efficiency is the objective. To what degree these objectives are attained depends largely on the accuracy which goes into the building. And accuracy is attained either by the superior skill that comes through long years of experience and patient, painstaking work or by tools designed to make up for the skill which the less experienced workman lacks.

Thus, the superior but costly workmanship, once confined to the few, is now made possible of achievement to the many. Operations that were once considered possible only by the skilled workman are now simplified by tools so efficient, yet so simple that they practically provide all the skill one may lack to do work comparable with that of the master craftsman.

WE GUARANTEE SATISFACTION
MAKES THE DRUDGERY OF THE PAST the PLEASURE of TO-DAY

PROVEN QUALITY — UNQUESTIONABLY LOW PRICED

Sears, Roebuck and Co., with their progressive policies of merchandising, bring to you on the following pages moderately priced, efficient, labor-saving tools. Every item has been selected only after having passed the most searching tests, both in our laboratories and in actual use over long periods of time. Every piece is presented on its merits for real practicability and is the best tool or machine that can possibly be built for its purpose at anything like its price. Every item is a practical necessity for the home craftsman or trade shop.

We believe you, as a progressive craftsman, ready to accept proven, scientific mechanical aid in your work, will be interested in reviewing these pages. We believe also that you will be impressed with the fact that the use of any item shown will permit you to accomplish more and better work than the workman, skilled or unskilled, could produce by exhausting his patience and time through the use of old methods.

Electrically driven tools are recognized in the large industrial plants for their efficiency and labor saving. Now you can have for a small cost these wonderful new shop tools in your own home or workshop at practically the same price as the old antiquated hand tools.
Every essential tool, ready to set up in your workshop and operate from ordinary house current! The "DRIVER" outfit is especially designed for the home craftsman, but is strong and capable of turning out woodworking jobs of all kinds...and the price is so low!

**A RECENT DEVELOPMENT**

Such workshops as the "DRIVER" have been available only a comparatively short time. Prices are higher elsewhere for the same type of outfit...we save you money and guarantee to satisfy you completely!

Think what these tools will do installed in your own workshop...wood-turning, planing, jointing either straight or at an angle, jigsawing, silhouetting, grooving, dadoing and rabbeting, sanding, grinding, drilling and fluting. Complete shop includes the following tools described elsewhere in this book.

- 99BM5068—Lathe
- 9B5312—Bench Saw
- 9B5308—Planer
- 9B5351—Jig Saw

Sears low price places the "DRIVER" complete workshop in reach of all! Order TODAY...and have all the things you've planned to make.

**COMPLETE "DRIVER" WORKSHOP**

99BM507—"DRIVER" Workshop, Complete, with Bench, 1/2-H.P., A.C., 60-cycle 110 to 120-volt, heavy duty type electric motor. Ready to operate. Shipping weight, 210 lbs. Cash Price...$59.50

On Easy Payments ($13.00 Down, $9.00 a Month)...$65.45

99BM5094—"DRIVER" Workshop without bench or motor. Shipping weight, 110 lbs. Cash Price...$42.00

On Easy Payments ($9.00 Down, $6.50 a month)...$46.20

On Easy Payments ($11.00 Down, $8.00 a month)...$57.20

When ordering on easy payments use Time Payment side of Order Blank enclosed with this catalog. All "DRIVER" Workshops shipped by freight or express. Not Prepaid.
"DRIVER" BELT SANDER

$5.25

AS SHOWN Postpaid

Sanding—one of the most vital, yet one of the most tedious operations in woodworking is greatly simplified by this ingenious machine.

The "DRIVER" belt sander eliminates much of the hand work and saves considerable time. The endless abrasive belt traveling over rubber faced pulleys quickly puts a smooth, straight grain finish on wood, bakelite and metal objects pressed lightly against it. A flat metal bed under the belt preserves straight lines and sharp edges. The adjustable fence permits accurate sanding of angles such as those used in mitered corners, etc. For sanding extra long pieces, the fence is easily removed. Furnished without the sander.

Excellent results in sharpening chisels, planer blades and other keen edged tools are obtained with the belt sander because it grinds the entire surface all the time and does not overheat the tool.

Operating speeds of 1750 R.P.M., or 3500 R.P.M. are both satisfactory, the slower speed being preferred for light sanding of small articles while the higher speed is desirable for heavy work. For 1750 use 9B5324 pulley on counter shaft. For 3500 use 9B6644 pulley. Ht. 9 in., Lgth. 15 in.

9B5099—Belt Sander, Postpaid $5.25

9B5376—Extra Abrasive Belt for above 30"x3" Coarse or fine. State choice. Wt., 2 oz. Postpaid with orders of $2.00 or more. See page 1. Each .39

(Parts for this machine shown on Page 11)

"DRIVER" PLANER OR JOINTER

$6.98

Complete as Shown

The "DRIVER" Planer or Jointer is of sturdy construction, designed for accurate high-speed work. It is the rigid table type employing a simple thickness plate clamped over each table for varying the depth of cut. On the lower table it reduces the standard cut from 1/16" to 1/32". On the opposite table it increases the cut to 3/32", thus providing three depths of cut. Stock up to 4" wide may be planed. Length of table, 16 in.

An improved fence which tilts at any angle can be moved in an upright position across the table distributing the wear to the full width of the blades. The cutter head of non-shatterable alloy is the latest approved round safety type. Blades are high carbon steel. A protective guard actuated by a return spring swings over the blades so that either the wood being planed or the guard itself keep them covered at all times. As a safety precaution the planer should never be operated without the guard in place.

Driven at about 5000 R.P.M. by the "V" type transmission which minimizes slipping. Pulleys, belt and adjusting plate supplied.

9B5308—Planer Complete as above. Postpaid $6.98

9B5395—Planer Only, Postpaid $5.98

(Parts for this machine shown on Page 10)
"DRIVER" BENCH SAW

$9.50

Complete as Shown
POSTPAID

Never before has a bench saw incorporating so many worthwhile features, been available at a price even approaching that of the "DRIVER" Ball-bearing Bench Saw. Not only does it deliver the service expected of a saw—ripping and cross-cutting stock up to 1¾ inches thick, straight or at various angles—it may also be used with excellent results for sanding, grinding, dadoing, grooving and rabbing.

Has Safety Guard

Two high grade 6" saws are supplied, one for ripping, the other for cross-cutting. Cuts lumber up to 1¾". A six inch metal face plate with six extra abrasives, 29" Endless "V" Belt, 2½" pulley, safety guard and splitter, ripping fence and graduated mitre gauge are also included.

The table measures 8¾" x 13½" providing ample room for all ordinary work. Height over all 6½ in. For sanding, grinding or dadoing the table strips on either side of the saw are removed to permit the wider attachments.

The bottom of the sub-base fits rails on the base and is held in place by a single bolt thus assuring instant belt adjustment. Operating speed about 3500 R.P.M. obtained with pulleys supplied.

9B5312—Bench Saw complete as described above, POSTPAID...........$9.50
9B6613—Bench Saw only with one 6" Circular Saw Blade, POSTPAID...$7.25

(Parts for this machine shown on Page 11)

"DRIVER" POLISHING HEAD SET

$4.65

Complete
POSTPAID

The polishing head with its numerous accessories is handy for sharpening tools, removing rust and paint, grinding and polishing metals and drilling. With the 4" circular saw and steel table shown it can be used for sawing wood, as the table is designed to fit over the head where it screws in place.

MAKES PERMANENT SET-UP

The tapered end of the spindle is used for holding lead centered cloth buffers while the half-inch end carries all the other accessories.

When mounted with other "DRIVER" Power Tools the polishing head is usually used as a permanent set up for drilling or grinding enabling the craftsman to "touch-up" a chisel point in a few seconds.

Included in this set are the polishing head, height over all 6 in., with spindle, pulley and nuts, ¼" Drill Chuck, 4" x ½" Vitrified Grinding Wheel, 4" Coarse and Fine Wire Wheels, 4" Circular Saw, 8" x 8" Saw Table, 5 ft. leather belt, 3" and 6" Cloth Buffers and cake of buffing compound. POSTPAID.

9B5859—Complete Polishing Set..................$4.65

Items Below POSTPAID with Orders of $2.00 or more. See Page 1.

9B5871—Polishing Head only, Wt., 2½ lbs...$9.5
9B5883—4" Saw only, Wt., 8 oz..............$7.0
9B5885—Saw Table only, Wt., 2 lbs...........$7.5
The "DRIVER" Shaper is of the ball-bearing vertical type and is used for making mouldings, putting fancy edges on table tops and cutting attractive moulding designs on picture frames. With the correct attachments it may also be used for sanding, dadoing and panel raising.

**Work Always in Sight**

An outstanding advantage of the vertical Spindle Shaper over those of other types is that it is possible to watch the progress of the wood as it is being fed. The same feature applies to all operations whether shaping, sanding or dadoing. The set of seven cutters supplied, used in various positions and combinations provide at least forty or fifty different designs. Part of these are made possible by the unique head assembly which may be lowered, raised or tilted to vary the cut.

A set of depth washers and guide collars restrict the depth of cut according to the needs. This machine is unusually well guarded and has a remarkably efficient system of guides. A set of larger shaping cutters, shown on page 16 under the Drill Press may be used on the shaper. This is a high speed machine and should turn at about 8000 to 10,000 R.P.M. This speed is obtained by using an 9B6644 pulley on a countershaft which is turning at 3500 R.P.M. Height over all, 6¾ in. Table about 9x14 in.

9B5325 - Shaper complete with 7 Fluting and Cove Cutters, Depth Collars and Panel Knife. Postpaid $9.95

(Parts for this machine shown on Page 10)

---

From its first appearance this remarkable machine has been received with great enthusiasm by men and boys alike and its popularity is steadily increasing! Simplicity of design, ease of operation and low price all have their attraction, but after all it is the proven ability of this machine to perform in a manner comparable to that of lathes selling at many times its cost which is earning it thousands of new friends every year.

The lathe base is of channel iron with a center support for rigidity. Head and tail stocks are movable along bed. A 6" tool rest and a 24" combination tool rest are both supplied. The standard wood turning dog may be replaced with the cup center for turning pieces of small diameter. Length of bed is 30", 6¾-in. Swing. An extra section of bed may be added to double the turning capacity. A ball thrust bearing carries the end thrust of head stock spindle. Skew and gouge chisels and wrench also supplied. Ordinary turning speed 1750 R.P.M. obtained by using pulley 9B5324 on countershaft.

9B5065 - Lathe complete as described above. Postpaid $7.50

9B5057 - Lathe only. Postpaid $3.90

(Parts for this machine shown on Page 10)
New uses for the power jig saw are constantly developing. These, added to the innumerable established uses for this creative machine, make it indispensable to the home craftsman and others interested in making attractive novelties. Colorful lawn ornaments, weather vanes, book ends, door stops, silhouettes for interior decoration, as well as dozens of other items of general interest are easily cut out with the jig saw.

**SAFETY IS A FEATURE**

The "DRIVER" Jig Saw is absolutely safe to use, well balanced, accurate and free from vibration. The table tilts to 45 degrees accommodating a wide variety of work. The arms are of wood encased in steel, a feature which combines the strength of steel with the flexibility of wood. Driving mechanism is mounted independent of table. A turnbuckle provides adjustment for tension of saw blade. A set of fret saw adapters is provided for holding the small fret saws used in delicate scroll work. The larger pin type blades are held by the standard clips. Size of table, 8x8 in.; throat, 14 in.; sawing capacity, wood, 1¾ in. Height over all, 11 in. Best operating speed for the Jig Saw is from about 450 to 500 R.P.M., obtained by using the 9B6573 pulley on counter shaft or motor.

9B5351—Jig Saw Complete as illustrated with 9 assorted blades, practical manual, fret saw adapters and pulley. Postpaid $5.65
9B6567—Jig Saw only. Postpaid $4.50
(Parts for this machine shown on Page 10)

**"DRIVER" MANUAL**

The "DRIVER" Manual contains 48 pages of detailed information every operator should know. Pages on selection of woods, what joints to use, woodturning, jigsawing, moulding, carving, finishing, etc. Ten large working drawings of articles to make with photographs and descriptions, also group of smaller projects—all designed by W. W. Klenke, nationally known Manual Training Instructor, author of numerous books on woodworking. Postpaid with $2.00 Order. See page 1.

9B5369—"DRIVER" Woodworking Manual. Shpg. wt., 4 oz. $ .25

**JIG SAW CUTOUTS**

Contains many ideas on jigsawing with actual size, easy-to-follow designs of novelties, toys, book ends, jewel chest, ship model, etc. Most designs in four colors enabling you to transfer direct to wood or trace.

Ship model drawings and description by Capt. E. A. McCann, recognized ship model expert and author of popular magazine articles on ship model making. Postpaid with $2.00 Order. See page 1.

9B6569—Book of Cutouts. Shpg. wt., 4 oz. $ .25
"DRIVER" Workbench

For those who want a sturdy built work bench for mounting the "DRIVER" Workshop power tools, this unit will meet all your requirements. It is also a handy bench for many other uses—in garages, or for factory assembly. Made with heavy steel legs, well braced and electrically welded. Heavy 1 in., 5 ply laminated wood top. Height, 32 in. Length, 6 ft. Width, 2 ft. (Not assembled.) Shpg. wt., 75 lbs. Shipped freight or express.

99BM5421 Not Prepaid $9.75

Jack Shaft Stand

For use with 99BM518 Lathe, Page 14. Also can be used with "DRIVER" Bench Saw, Planer or Drill Press when desired to run these tools over line shaft. This assembly provides a handy jack shaft set up for increasing or reducing speeds. It is especially useful for increasing the drill press speed for routing and shaping operations. The bolt holes in the base are placed identically with those of the motor so that they may be interchanged if desired. Complete with extra 4-in. 4 step "V" type pulley, giving a range of 4 speeds.

99BS516—Complete as shown. Postpaid $3.50

9BB658—4 step Pulley. Wt., 1 lb. .50

Postpaid with orders of $2.00 or more. See Page 1.

Arbor and Chuck

Three-jaw chucks, 1/4-in. capacity. Fits 1/4-in. shaft, for drilling, grinding, buffing and other work. Suitable for use with "DRIVER" workshop. 9BS575—Shpg. wt., 1 lb. .98c

"DRIVER" Cement for attaching sanding discs. Cements rubber, metal or wood.

9BS5316—Wt., 8 oz. .39c

Motor Adjusting Rails

This new "DRIVER" development permits greater movement of motor for belt adjustment. Every make of motor will fit these cast iron rails as they are not attached together and may be located at any required distance apart. Ordinary wood screws inserted at the end of each rail hold it securely to bench. Four special square head bolts, for securing motor, included. Postpaid with $2.00 orders. See page 1.

9B6697—Set Motor Adjusting Rails. Shpg. wt., 2 lbs. .75c

Sears, Roebuck and Co.

We Guarantee Satisfaction on All Your Purchases
THE SHOP
ON THE JOB

Any mechanic who has used "DRIVER" Power Tools in his shop knows full well the handicap of working on the job with ordinary hand tools. If you are one of the many who have experienced this feeling of inefficiency when away from your power equipment, you will appreciate the suggestion offered in the above illustration. Enthusiastic tradesmen everywhere are fast adopting this "shop on the job" idea, not only because of the time and labor it saves but because it assures quality workmanship, customer satisfaction and repeat business.

No matter how exacting you are in the selection of power tools, "DRIVER" tools will fill all of your requirements. They are mechanically correct, skillfully designed, and capable of rendering efficient service on daily production work. Manufactured of the finest materials and carefully tested at the factory, you are assured of a perfect machine.

Now that Heavy Duty "DRIVER" Tools are available, the "shop on the job" idea becomes all the more advantageous because of the additional jobs these heavy duty tools are capable of performing. When you read the following pages and learn the many uses of each tool, just stop and consider how profitable they could be to you on your next job.

The "DRIVER" Power Tool Assembly is readily portable . . . a complete and compact working unit . . . small enough for any truck—large enough for most any job.

THE SHOP
IN THE HOME

With "DRIVER" Power Tools available at such reasonable prices, there is no real reason why anyone should handicap his creative instinct and inventive skill. The small investment required for a home workshop is returned to you manifold, not only because it affords a stimulating, productive occupation that relaxes your mind from the strain of everyday routine, but equally important, it permits making dozens of practical pieces of furniture and bric-a-brac for the home, for the homes of friends, or even for sale.

Or, if you are a model maker or of an inventive turn of mind, your workshop will prove invaluable as a quiet and efficient place to develop your ideas into realities.

As you study the pages of this catalog, think what a world of possibilities—what untold fascination is open to you the moment you decide to own a "DRIVER" home workshop.

The heavy duty equipment shown on the following pages comes to you as a result of a growing demand from users of the standard lightweight tools for production units . . . units that would stand up indefinitely under the strain of professional use. Once you see their simple but rugged construction, their efficiency and all-round worthiness, you will agree that this demand has been admirably fulfilled—you will want and need the help of these better tools in your own shop.
HEAVY DUTY "DRIVER" BENCH SAW
CASH PRICE
$42.50
Complete with Motor

TIMKEN BEARINGS
A new heavy duty fast-cutting saw for the carpenter, contractor or home craftsman. Substantially built for daily production work.

EXCELLENT PORTABLE OUTFIT
Many months of intensive study and experimental work are behind this saw. As presented it has several unique features, yet it is strikingly simple and rugged, makes an excellent portable outfit. Equipped with high grade 8" saw which instantly raises or lowers without the use of a wrench or other tool. TIMKEN TAPERED ROLLER BEARINGS insure efficient, frictionless performance over a long period of years. Rips and crosscuts up to 2½" stock. Table 17"x13¼", tilts easily and quickly to 45 degrees. Extremely rigid ripping fence. Slotted base for belt adjustment, aluminum guard and splitter, graduated mitre gauge and many other features guarantee you uninterrupted, dependable service. Shipped Freight or Express, Not Prepaid.

99BM5993—With ½-H.P. motor, 3600 R.P.M., 110-120 Volts, 60 cycle, A.C. Shpg. wt., 100 lbs. Cash Price...$42.50
Time Payment Price, $9.50 down and $6.50 a month...$46.75

99BM5994—Outfit without motor, Shpg. wt., 75 lbs., Cash only...$29.50

HEAVY DUTY "DRIVER" PLANER
CASH PRICE
$35.00
Complete with Motor

TIMKEN BEARINGS
No expense has been spared to make this 4" planer the outstanding leader in its class. Everything in design, in material, and in workmanship that would contribute toward this end is incorporated in it.
Both tables are instantly adjustable, the rear one providing a ledge for rabbing. Extremely rigid tilting fence is adjustable to 45 degrees in either direction. Approved safety type cutter head carrying three high speed steel knives, with ¾" shaft turns on two rows of TIMKEN TAPERED ROLLER BEARINGS. These bearings require lubrication only once or twice a year. Approved safety guard covers knives receding as work is fed so that they are covered at all times. Length of table overall, 19". Height, 8¼". Heavy duty ⅜-H.P. motor, 110 volt, 60 cycle, A.C., 1750 R.P.M. with double end shaft, plug and cord. Shipped Freight or Express, Not Prepaid.

99BM5314—Complete. Shpg. wt., 100 lbs. Cash Price...$35.00
Time Payment Price, $8.00 down and $6.00 a month...$38.30

99BM515—Without motor. Shpg. wt., 75 lbs. Cash Only...$24.00

When ordering on Easy Payments use Time Payment Side of Blank enclosed with this book.
New HEAVY DUTY "DRIVER" LATHE

This new lathe with Genuine TIMKEN BEARINGS represents the greatest value ever offered in a machine of its type. Serviceable for daily production work in the carpenter shop or home workshop.

An unusual feature is the combination driving dog and small face plate. Two spurs are fitted in holes in the 2" face plate. These spurs may be used in the two holes near the center for small turnings or two other holes near the outer edge for larger work. The hardened steel center is removable and may be replaced with a wood screw center for very small turnings. Motor bracket attaches to lathe bed and provides very convenient set up. Lathe, however, may be driven from above, behind or below.

SPECIFICATIONS

Heavy channel iron bed, 42" long, 41/2" wide, 21/2" deep. (Extra section may be added to bring length to 7 ft.) Distance from center of headstock to bed 5", taking stock up to 12" diameter. 4-step cone pulleys provide four speed changes without altering belt adjustment. Speeds approximately 700, 1350, 2200 and 4000 R.P.M. Fabric and rubber endless "V" Belt. Two tool rests, 12" and 6" supplied. Double row TIMKEN Tapered Roller Bearings in head require lubrication only once or twice a year. Adapter for holding 1/2" drill chuck, sanding drum and grinding wheel attaches to head spindle. Turning chisels are high quality crucible steel. Tailstock spindle, 5/8" diameter, has position lock. Heavy Duty 1/2 H.P. Motor, 1750 R.P.M., A.C. 110-Volt, 60 Cycle. Shipping weight, 80 lbs. Shipped freight or express, not prepaid.

99BM517—Complete as shown...........$39.50
Time Payment price, $9.00 down and $5.00 a month.........$43.45

99BM518. As above, without motor or motor bracket. Shipping weight, 50 lbs. Cash only $24.30.
When ordering on easy payments, use time payment side of order blank enclosed.

New HEAVY DUTY "DRIVER" ONLY

BENCH GRINDER

This new "DRIVER" Tool will be welcomed by many who need a heavy combination polishing head and bench grinder. It is built for regular production work yet priced so amazingly low that every home craftsman will want one. Bearings are bronze bushed, with a 5/8" diameter shaft turned down to 1/2" at the ends to take all standard "DRIVER" accessories. Grease cups supply positive lubrication. Adjustable tool rests and guards are ingeniously arranged so that they work effectively with both 4" and 6" wheels.

This polishing head is so designed that it can be driven from below, behind or above, with a "V" round or flat belt by changing pulleys. Sufficient clearance is left between bearings to accommodate a flat belt pulley. A 1 1/4" diameter "V" pulley is furnished as regular equipment.

986696—Complete as shown with one 6 in. Coarse grinding wheel and one 6 in. Fine grinding wheel.
Postpaid.................................$4.95

SEARS, ROEBUCK AND CO.

ROSE TOOLS, INC.
New "DRIVER" BAND SAW
$19.50

Complete with Saw blade and guards as shown

For many months there has been an insistent demand for a Band Saw—made by "DRIVER." Our friends here literally swamped us with requests and suggestions along this line. Although "DRIVER" engineers are always appreciative of the suggestions of their friends, they could not be hurried into getting this machine out quickly. It was too important a job. There were hazards to overcome, improvements to make, many designs to try out and discard.

Here are a few of its many features—12" dia. wheels, rubber faced; 5/8" dia. wheel bearings, bronze bushed; table is 12"x11", tilting to 45 degrees. Distance from saw blade to frame 12"; roller guides for saw (an expensive feature usually found only on very costly machines). Easy positive adjustments for saw tension and wheel alignment. Cuts lumber up to 6" thick. Shipping weight, 95 lbs. Shipped freight or express, not prepaid.

99BM549—Complete with 3/4 in. Saw blade and Guards as shown.................................$19.50

Parts for Converting Band Saw into Jig Saw, as Shown.

New Idea Jig Saw Attachment For Band Saw!

Converting a band saw, in a few minutes, into a "super" jig saw may be a bit unusual, but it is entirely practical. In fact a few inexpensive parts will give you an entirely new idea as to what a jig saw can do. The massive frame, base and table lend great rigidity while the same roller guides that are used with the band saw assure an absolutely true-running blade. Two metal arms take the place of the wheels, guards are removed, and a drag link assembly is slid into place in the frame. The upper guide assembly in position directly over the work acts as an excellent "hold down" arm preventing the saw from lifting the work off the table on the up stroke.

A novel feature is the positive blower attachment. This is a pump composed of a piston and cylinder with a rubber tube connected to a hole in the saw guide. When the saw is in motion a stream of air keeps the saw dust from obscuring the lines, and incidentally cools the saw blade, greatly prolonging its life. The flexible rubber tubing provides positive pressure at any position of the guide assembly. Postpaid.

9B6695—Complete set of parts for converting Band Saw into Jig Saw. With 6 ass't. blades. Length 14 in. ..................$4.95

PARTS FOR BAND SAW

We can supply the following parts for the "DRIVER" band saw: Base, Bearing Stand, Main Shaft with Key and Nut, Table Bracket, Table, Upper and Lower Saw Guide Assembly, Upper Frame Extension, Bearing Guide Bracket, Alignment Assembly and Frame Section, Lower Frame Section, Saw Wheels with Rubber Facing, Upper and Lower Saw Guard, Hinge Assembly for Guards, and 6 1/2-inch V Pulley. All are of high quality materials, guaranteed to fit and give long service. Write for Prices, Mentioning Part Interested In.
"DRIVER" DRILL PRESS
6 TOOLS IN ONE $11.95

Compared with other makes, you save up to one half!

Drill Press
Complete with Motor and Jacobs Chuck
Sold on Easy Payments

$7.00 DOWN

Balance Monthly

The "DRIVER" Drill Press, always noted for its compactness and all-around efficiency, now incorporates features that make it the most complete machine tool of its kind!

Compare this machine with others selling at three or four times the price. You will find it equal, if not superior, in capacity, in ease of operation, in character of output and in durability. Why, then, pay more?

Now you can perform operations not usually possible in the home workshop, much less available in one machine—Inlaying, Carving, Shaping, Mortising, Tenoning, Dovetail Cutting. Its extremely varied uses and unusual performance more than justify the investment that thousands are making in this machine.

Handles More Jobs

DRILLING

This drill is built for heavy continuous drilling up to and including 1/2" holes. A series of holes of equal depth can be rapidly drilled by locking adjustable collar on rear spindle to restrict the depth drill can be lowered.

MORTISING

Router bits in 5 sizes are available. Work to be mortised is held between 2 guides, the spindle lowered to cut about 1/4", locked there and work moved until desired length is obtained. Repeating the cut, 1/4" at a time, quickly gives the required depth.

DOVETAILING

Dovetail joints which are often desirable because of their strength and permanency have been very difficult to make without expensive production machinery. Three sizes of dovetail cutters are available.

SHAPING

Cutting of various molding, decorative edges on table tops, etc., usually requires a separate machine, but the "DRIVER" Drill Press does this work efficiently. A wood platform, larger than the drill press table is made and placed over table to hold guide. Four cutters providing about 25 or 30 different cuts are available.

INLAYING

With a few hours experience you can do work comparable to that turned out by skilled artisans working with hand tools. Spindle is locked at correct depth and work moved about until recess is completed.

Tenoning

A saw cut, of equal depth to what the width of the tenon will be, is made across the end of the work. Then, with a router bit of the material between the saw cut and the end of work is easily removed, to uniform thickness.

Mechanically Correct

For the home craftsman who takes pride in a good job well done—the skilled mechanic who requires a high degree of accuracy—or the small factory or pattern shop where efficient volume production is desirable, the new "DRIVER" Drill Press meets all requirements. Its wide range of uses (more than on any similar machine) provide a new stimulus to the creative instinct. Its faultless construction insures extreme durability and its correct design assures efficient output. It is unique in its ability to handle jobs not heretofore possible in a machine of this type, and when you realize that it compares only with the machines selling from two to three times more, its value is astonishing!

Range of speed, from 750 to 4000 R.P.M. Spindle. 1/4". Rear spindle graduated for depth. Table and head both movable up and down steel column. Feed rack can be locked at any position, 1/2" "DRIVER" chuck takes straight shank drills. 8" x 8" table tilts two ways. 58° "V" type belt. Head bearings are bronze bushed. Height over all, 28 in. Shipped freight or express, Not Prepaid. Shipping weight, 70 lbs. Accessories listed below.

99BM512—Drill Press only, without motor. $11.95
99BM513—With 3/4-H.P. double shaft motor for 110-120 volt A.C. 60-cycle. Shipping weight, 92 lbs. $24.00

REPAIR PARTS

We can supply the following parts for the "DRIVER"

Drill Press: Head Bracket, Base, Table Bracket, Table, Idler Complete, Belt Guard, Spindle Drive Pulley, Feed Rack with Lower Bracket, Feed Pinion with Return Spring, Spindle with Ball Thrust and Upper Bracket and Steel Column.

These parts, shipped from factory in New Jersey. Write for prices, mentioning part wanted.

SEARS, ROEBUCK AND CO.

PAGE 17
With the equipment shown here it is possible to sand, grind, drill, polish and buff anywhere within reach of an electric socket—at worth while savings in time and effort!
The flexible shaft has won its present important place in the home, shop, and industrial plant because it fills a definite need which nothing else meets as simply or as economically. It transmits power at various speeds with the continuity and properties of a solid shaft, yet can be operated around corners, at various angles, and in inaccessible places. Thus it enables the operator to perform difficult, tedious work such as drilling, sanding, polishing, grinding, paint removing and almost unlimited other jobs at a minimum of time and effort.

High Speed Ball Bearings

The quality and utility of the "DRIVER" Flexible Shaft should not be underestimated because of its extremely low price. Only the best materials are used throughout. High speed ball bearings—two rows in each end—reduce friction, eliminate overheating and consequent wear to an absolute minimum and increase substantially the amount of power delivered to the tool.

To make the outfit readily portable a base with metal casters is provided on which the motor table swivels. An exclusive feature of the "DRIVER" Flexible Shaft is that two sections may be coupled together to double the length and working radius.

Polish Your Car Electrically!

With the "DRIVER" Flexible Shaft, it is easy to keep your car always looking like new. The special sheepskin polishers shown are used for cleaning and polishing. "Traffic film" quickly yields to this modern method. Shipped Prepaid.

PATHFINDER
5 TOOLS IN ONE:
Circular Rip Saw
Cross Cut Saw
18-Inch Band Saw
6-Inch Jointer
Boring Machine

Here is a favorite in America's leading woodworking industries. A superior machine for any job, large or small. We have incorporated in the PATHFINDER every important improvement in tool design and guarantee it whole-heartedly for its ability to turn out work in unusually large volume. Not only do we offer it at an attractive money-saving price, but we allow you 10 months to pay if you wish!

Frame. Heavy 2-inch angle steel, electrically welded.
Base, heavy channel steel welded to frame.
Saw Table. Heavy angle steel frame with channel steel slats welded to the frame. Height, 2 ft. 9½ in.; width, 20 in.; length, 3 ft. Has opening for 12-inch saw which will cut 4 inches deep.
6-Inch Jointer. Round safety head with three knives, cutter circle 4½ inches in diameter. Jointer bed plates of steel; front plate 18 in. long, rear plate 24 in. long. 18-Inch Band Saw. Cuts to center of 36-inch circle. Table measures 14¼ x 17¼ in., stands 40 in. from floor and can be tilted for sawing bevels.
Drill. Takes bits with 1/4-inch round shank from 1/2 to 1½ in. Adjustable sliding table can be raised or lowered to take up to 2½ inches below center of bit and has stop for regulating depth of hole.
Tilting Guide. Used for jointer and rip saw to tilt to angle of 45 degrees and is adjustable for ripping up to 10 inches in width.
Cross Cut Guide. Slides in milled groove and has angle adjustment of 45 degrees.
Saw Mandrel. 1 inch in diameter, 30 inches long. Takes saws with 5/8-inch hole.
Drive Shaft. Lower shaft of the band saw.
Bearings. 3 inches wide, full babbitted.
Drive Pulleys. 8x3-inch Tidt and Loose.
Speed. 600 R.P.M.
Floor Space. 48x72 inches.
Shipping Weight. 700 lbs. With Motor, 775 lbs.

Portable!
No Vibration!

THIS powerful little motor weighs but 40 pounds
and therefore adds very little in weight to any
piece of motor driven machinery. It is actually not
too heavy for any woman to handle. Valveless;
every stroke is a power stroke. Very little vibration
because of the consequent elimination of dead
spots and unnecessary moving parts. The only
moving parts are the piston, connecting rod, crank-
shaft and magneto. Can be quickly stopped by a
convenient stop button. Simple governor maintains
constant speed. No carburetor adjustment is
ever necessary. Lubricate by mixing 1/2 pint good
lubricating oil with each gallon of gas.

EFFICIENCY ... COMPACTNESS

Here is instant power at the pull of a handle—
cheap power that is dependable on any occasion
and for any purpose. The Johnson 1/2 H.P. Utilimotor
is the lowest-priced power unit of that capacity ever
made. It has no superior for efficiency and compactness.
Delivers more power, pound for pound, than any other gasoline motor of equal rating.
Hundreds of thousands of this type of motor in use
all over the world prove it to be by far the most
satisfactory of all fractional horse-power motors.
Shipped not prepaid from factory in
NORTHERN ILLINOIS.
99BM8850 1/2—Johnson Utilimotor ... $29.50
Time payment price—$7.00 down and $5.00 a

SEARS, ROEBUCK AND CO.

ROSE TOOLS, INC.
CRAFTSMAN Oxy-Acetylene WELDING OUTFIT

$39.90 Cash
COMPLETE POSTPAID

The biggest value in welding equipment ever offered at the price. A high quality, safe, dependable outfit unexcelled in workmanship or design.

All brass, beveled glass, double gauge regulators; heavy duty perfectly balanced, non-flash torch with five solid drawn, pure copper welding tips. All parts listed as standard by Underwriters' Laboratories. We believe this is the finest industrial welding unit ever produced. The outfit has capacity for welding or brazing from light sheet metal up to heavy tractor and machinery parts.

All Metals Can Be Welded

Outfit includes torch 17½” long, with five pure copper welding tips; oxygen regulator with one 3000-pound and one 80-pound brass gauge; acetylene regulator with one 500-pound and one 80-pound brass gauge; two 12½-foot lengths of heavy duty corrugated hose with connections; torch lighter; welding goggles; 24 assorted welding rods; one can of flux for all kinds of welding and brazing and a

CRAFTSMAN Cutting Attachment

Will convert the CRAFTSMAN Welding Outilt into a highly efficient cutting outfit in less than one minute. Simple and safe to operate. Connects to CRAFTSMAN Welding Torch in

208-page Welder's Manual which usually sells for $2.50.

CASH PRICE COMPLETE

On Easy Payments
$6.50 Down $5.00 Monthly

Here's How You Can Save at Sears!
You can pay $68.50 for this sprayer elsewhere, or send us $39.95 and save $28.55. In either case the quality is identically the same—the same gun, the same compressor. In fact made by the same manufacturer.

Never has a sprayer of such quality, with so many features, been sold at such a low price, and it is unconditionally guaranteed by the World's Largest Store.

Electric PORTABLE SPRAYER
Full Commercial Size . . . Sprays All Kinds of Paint and Insecticides

Here is a strong, reliable, portable spray painting outfit that is giving satisfaction to thousands of users. IT GIVES SATISFACTION IN USE AND SATISFACTION IN MONEY SAVED. This same sprayer sells elsewhere for $68.50 and our low price saves you $28.55. Garages and truck operators are using them for touch-up work; painters, building managers and refinishing shops for a multitude of uses.

Invaluable to a home owner for odd painting jobs, refinishing furniture, radiators, etc. Atomizing efficiency is such that it handles lacquers, oil paints, varnish, decorative enamels, metallic paints (bronze, gilt, etc.), and cold water paints. Will also spray many other liquids.

Develops 60 lbs. Pressure

Gun is specially designed pressure type to take full advantage of the air delivered by the compressor unit. Compressor air cooled and well built. Working pressure, about 40 lbs., but can build up to 60 lbs. pressure (for tire inflation) without overloading motor. 15' of high pressure hose and 10' electrical attachment cord. Size overall, 20"x15"x9". Shipping weight, 65 lbs.

Shipped Freight or Express, Not Prepaid. For 110 to 120-volt, 60-cycle current only.

COMMANDER
HEAVY DUTY MOTOR
Guaranteed 5 Years
1/2-H.P.
Ball Bearing
Double Shaft $12.00 Postpaid

Why COMMANDER MOTORS are Better

2. Lifetime starting switch. Withstands over 500,000 starts. Guaranteed a lifetime.
3. Windings guaranteed moisture-proof.
4. Forced air cooling.
5. Splash-proof end plates.
6. Accessible terminal and reversing box.
7. Ten feet of heavy rubber covered cord and unbreakable plug. Also 2-inch grooved pulley.
8. Guaranteed for 5 years—but built to last much longer.

A cool, smooth, quiet-running motor with loads of excess power. Although rated 1/2-H.P., it will actually carry a 1-H.P. continuous load! A very popular motor for running shop tools such as drill presses, grinders, lathes, planers and saws. Also runs feed mills, sign flashers, small air compressors, etc.

The grease packed New Departure Ball Bearings insure trouble-free continuous service. Very economical to run. Tests show that it consumes 10% less current than ordinary electric motors.

Machined 1/2-inch double steel shaft with 2-inch grooved pulley on one end. Base holes measure 3 1/4 in. across, and 5 in. from brace to brace. 1/2-in. pulley shaft. Speed, 1750 R.P.M. 10-ft. cord, plug and pulley included. 110 to 120 Volt, 60-cycle A.C. Postpaid.

20B2228 1/2 $12.00
For other Motors see our General Catalog.

HEAVY DUTY Electric
FULTON GRINDER

A sturdy and dependable grinder that is ideal for garage, factory or farm use. Sears, Roebuck and Co.
"DRIVER" INLAY MOTIFS

Inlaying, one of the oldest of arts, adds rare beauty and distinction to numerous articles of furniture and novelties. Previously it has required such patience and skill, working with hand tools, that only a few "home craftsmen" have utilized its charm to create things of appealing beauty. Now, with the "DRIVER" Drill Press and special inlaying routers this operation is done so easily and quickly that practically anyone whether experienced or not can do inlaying. BELOW INLAY MOTIFS ABOUT 1/2 ACTUAL SIZE. Shpg. wt., each design, 1 oz. We Pay the Postage on orders of $2.00 or more. See page 1.

9B6674 FRENCH FLOWER OVAL, Ea., $1.00

9B6676 URN DESIGN, Ea., 50c

9B6680 CORNER FAN, Ea., 20c

9B6677 Oval Sunburst, Ea., 50c

9B6678 Tray Center, Ea., 69c

The use of these designs offers the home craftsman untold possibilities. New adaptations, new articles to make, together with new beauty and value will assure you far greater satisfaction in woodworking than you ever thought possible. For those who wish to realize profit on their work inlaying will open the door to innumerable possibilities as it takes furniture and novelties out of the realm of the ordinary "unpainted" variety into a class of work representing many times greater value.

These designs are also used with excellent effect as overlays. The bookends below are examples of this work. The designs are carefully glued to a block of wood before the protective border is removed, then cut to shape with a jig saw.
