Sears Introduce New and COMPANION
In a New Range of... Lower Prices... Higher Quality!

Sears, Roebuck and Co. are known to thousands of professional and home craftsmen as the largest and most reliable distributors of power tools. Nevertheless, we have been working earnestly to broaden our line, to make its leadership even more outstanding. And now, we offer you our own CRAFTSMAN and COMPANION Power Tools, the finest and most complete line of such tools ever put on the market!

CRAFTSMAN Power Tools combine all the refinements known to the industry. They are accurate, durable and guaranteed highest quality. COMPANION Power Tools are somewhat lower priced to meet the demand for good quality efficient power tools at greater saving.

Whether you wish to equip a shop with the necessary tools to give expression to a hobby, to equip the more advanced shop either for pleasure or profit, or to outfit a boy's workshop, you will find in this book just the tools you want. This new line of CRAFTSMAN and COMPANION power tools will be instantly recognized by their distinctive Royal Blue color.

Our Guarantee Protects You

Besides passing on to you the savings we make by large quantity buying, our one-profit system of distribution permits us to merchandise these tools at attractive, money-saving prices, and our straightforward guarantee, insures that you will be completely satisfied with your purchase.

Read our Guarantee. Sears are back of these tools with all the strength and resources of a Two Hundred Million Dollar organization.

Strict adherence to these high ideals is maintained consistently to the end that the user of Sears Power Tools may perform his work with the minimum of effort and in the shortest time; that the tools sold by us will give long, trouble-free service; and that our prices will continue to be the lowest anywhere on tools of similar quality. No stronger guarantee ever written. Back of it is our more than forty years experience, dealing with millions of customers.

Convenient Easy Payments

At Sears, you may have the new tools you want, to use and enjoy, while paying for them. No need to wait for some future day when you feel you may be able to spare the necessary cash. You can install any machine or workshop outfit costing $20.00 or more by paying only a small amount down and a small amount monthly...

See Easy Payment Prices and terms listed with tools. This is only another advantage you enjoy by buying your Power Tool equipment at Sears.

In the following pages you'll find just the outfit you want and at lowest prices. Equip that basement or attic now, with high quality CRAFTSMAN or COMPANION Power Tools! It's easy to order directly from this catalog. The index at right will help you. You'll find an Order Blank enclosed. Fill it out and mail your order TODAY! The sooner you have these fine Power Tools the sooner you can enjoy making useful things you have long wanted.
Craftsman Power Tools

Popular for Profit or Pleasure

Tools were man's first aid in his struggle for existence. Our power tools mark a long step forward from those primitive times: now you can use tools not only as a means to a livelihood but also as instruments for the derivation of pleasure.

Power tools are tremendously popular today, due to the change over from old hand methods to the use of up to date, inexpensive power tools. Work with power tools is interesting and profitable and leads to the creation of many useful articles and the saving of much labor.

A Profitable Business

Power tool products are made in large variety and are in universal demand. Many of our customers who first purchased tools for a spare time diversion are now using them as a foundation for a profitable business.

We Do Not Pay Postage

In view of the government's recent increase in postage in certain zones, we do not attempt to include in our prices in this catalog any average amount to cover postage. Our prices, therefore, make no allowance for postage and have been lowered accordingly. Include with your remittance an additional amount to pay the postage if shipment is to be made by parcel post.

In all catalog descriptions, shipping weights are given for your convenience in figuring amount to include to pay shipping charges. The heavy tools and machines are shipped not prepaid by freight or express as stated under each article. Send an ample amount to cover postage, freight or express charges; we always return every penny not actually used.

Build me straight, O worthy Master!
Staunch and strong, a goodly vessel
That shall laugh at all disaster,
And with wave and whirlwind wrestle!
—LONGFELLOW—"Building of the Ship"

Inspection at Factory Insures Highest Quality

Frequent inspections mark every step in the production of Sears CRAFTSMAN and COMPANION Power Tools. Men, expert in the use of every measuring instrument known to engineering, closely guard the accuracy with which these tools are machined and assembled.

Accurately Machined

Wheels must run true and in perfect balance, tables must be smooth and perfectly level, scales must be accurate and quickly adjustable. Think of it! Some parts are machined to one ten-thousandth of an inch and every part is finished to the highest degree of efficiency. These are fine points in the manufacture of tools that every good workman appreciates. You can do better work and do it easier with CRAFTSMAN or COMPANION tools.

High Quality, Low Price

Quality of materials, quality of workmanship, and finally, close expert inspection in the factory makes it possible for Sears to back every CRAFTSMAN and COMPANION Power Tool with an unlimited guarantee of quality. With all their improvements, CRAFTSMAN and COMPANION Tools cost you less than other similar quality tools sold elsewhere. The saving made possible by large quantity productions and our long established organization for easy, rapid, economical distribution bring prices down. Now everyone can own the finest power tools at prices to fit one's pocketbook. See the following pages for tools to suit your purpose. Now is the time to buy, while prices are low. Send us your order TODAY!
Practical Tests Prove Sears Tools are Reliable

Testing the cutting, turning, planing, shaping and other operations of CRAFTSMAN and COMPANION Power Tools is an important phase of factory production. Every CRAFTSMAN and COMPANION Tool is factory run to prove its ability to do good work under actual shop conditions.

Ready to Operate

Working on practical projects lathes, bandsaws, circular saws, shapers, planers, jig saws and all the rest of the equipment you would use in your own shop are given thorough trial before they are shipped to you. Such careful examination and testing insures that you will receive workable, properly made tools, ready to set up and operate in your shop.

All Practical Tests

In this testing, practical shop conditions are sought. Many operators are employed to give all power tools a thorough trial. Some of the projects are production jobs of turning and shaping such as furniture and cabinet work. Other projects include problems in manual training such as school boys are regularly assigned. Other work is of a light production kind such as jig saw puzzles, small furniture or toys.

Testing is an important part of CRAFTSMAN and COMPANION Power Tool production. The thoroughness with which every machine is tried and proven has made millions of satisfied users of Sears power tools. You can be sure that the CRAFTSMAN or COMPANION tools you buy will do the job accurately and easily, and will give you long, satisfactory service.

SEARS, ROEBUCK AND CO.

PAGE 3
CRAFTSMAN Power Tools
Are First Choice of Thousands!

Big, powerful, smooth running, handsome in their distinctive Royal Blue Color... CRAFTSMAN Power Tools are admired by home craftsmen and professionals alike. Picture to yourself your own workshop of highest grade CRAFTSMAN Tools! Think of the pleasure, the profit for you, in making every conceivable thing of wood, from toys to home furniture!

There's real satisfaction, too, in knowing that in CRAFTSMAN Power Tools you possess the very latest improvements in design, the most accurate machine work, highest quality materials and workmanship and all at far less cost than you'd ever expect to pay. Note the sturdy lines and professional appearance. The tools shown here are mounted in logical working position... you must see them set up in your own workshop to really appreciate their size and excellence. See the table at right for prices of individual tools.

We believe that individually motor driven tools, especially in the fairly large shop, are more economical in the long run. They do away with the loss of efficiency in the use of a line shaft. Now, modernize your shop completely by equipping all your power tools with motors, and for this purpose, we recommend the COMPANION 1/3 H.P. motor at left, above, fully described on page 30.

Man or boy, home craftsman or professional, you couldn't ask for better Quality... won't find it elsewhere in tools at anywhere near our low prices!
Shop... Driven

For Home or Professional Shop

This is the kind of a shop you have always wanted... Now, you can have all these highest quality tools at very low cost. Build your shop to this Ideal with CRAFTSMAN Power Tools! Send your order TODAY and Save Money!

The "BIG 4" COMPANION
POWER TOOLS
WORKSHOP

$22.50
CASH
Without Bench or Motor

Outfit Includes:

99P6901—10-inch JIG SAW with 6 blades.
99P597—6-inch LATHE with spur center, tool rest and tool rest holder.
99P6710—7-inch BENCH SAW with guard and miter gauge.
99P5871—No. 1 POLISHING HEAD with 1/4-in. chuck.

The "BIG 4" COMPANION Workshop includes the tools most popular with thousands and thousands of home craftsmen and the majority of users of power tools. They are just the ones most often selected to start a home outfit.

This new complete shop is now priced within the reach of most every home craftsman. They come ready to set up and operate on your regular house current. Send your order Today!

These Tools Will Handle Most Woodworking Jobs

In addition to the above, the "BIG 4" COMPANION workshop includes one 4-inch buffer, one 4-inch grinding wheel; four bronze bearing, adjustable shaft hangers; two lengths of 1/2-in. by 24-in. steel line shaft; one 4-in., 4-step "V" pulley; three "V" belt pulleys and necessary belts. Each item in this workshop is fully described on the following pages of this catalog.

99P496—"BIG 4" COMPANION Workshop, complete, without bench or motor. Shpg. wt., 125 lbs. Not Prepaid, shipped freight or express $22.50

99P497—WORKBENCH, with top 32 in. x 6 ft., of 1 1/2 in., 3-ply wood. Complete with steel bench legs, No. 99P560 (See page 39) for mounting the above tools. Shpg. wt., 110 lbs. Not Prepaid, shipped freight or express $9.95

99P499—1/2 H. P. COMPANION Motor, fully described on page 30. Ample power for operating the complete "BIG 4" COMPANION Workshop. For regular house current, 110 V., 60 cycle, A.C. Shpg. wt., 30 lbs. Not Prepaid $9.95
A Handy Saw for Jig Saw Puzzles and Other Light Production Work

COMPANION
10-INCH CAPACITY

FEATURES
Saw blade travels vertically.
Heavy, rigid semi-steel arched frame.
Modified Scotch yoke action.
Heavy steel table, 8x8 in. Tilts to 45 degrees.
Height, overall, 16 in.
Depth of throat, 10 in.

Believe it or not a $4.50 jig-saw that has incorporated in its design and mechanism all the features of machines selling for many times this price. Truly vertical saw movement. Enclosed spring type head mechanism. Adaptable to the use of either straight or pin type blades. Arched type, trussed frame. Smooth Scotch yoke movement operates with very little vibration. A truly outstanding value. For power, we recommend our 1/4 H.P. motor, No. 99P498, described on Page 8.

9P6901—Companion Jig Saw. Shpg. wt. 15 lbs. Not Prepaid. $4.50

CRAFTSMAN 14-in. Jig Saw

$9.50 COMPLETE without Motor

For power we recommend our 1/4 H.P. Motor, No. 99P498 described on Page 8.

FEATURES
Stroke, 1 inch—speed—800 strokes per minute, cuts up to 3 in. material.
Saw blade travels vertical.
Heavy trussed, arched, "Bridge type" frame. Resists vibration (see insert). Made of highest grade semi-steel casting.
Modified Scotch yoke action; mechanism enclosed in dust-proof housing below table. Parts run in bath of oil.
With blower for sawdust.
Heavy steel table, 9x9 in. Tilts 45 degrees, either left or right.
High grade wick oiled bronze bearings.

This new CRAFTSMAN Jig-Saw is of latest design, a marvel of efficiency and simplicity. It runs smoothly and without vibration. It cuts with a 1-inch stroke and takes either fret or jig saw blades from 5 in. to 6 1/2 in. long, plain or pin end. The CRAFTSMAN is an ideal saw, either for the beginner or for one with some experience who wishes it for home use. It can be used for fairly heavy duty professional work. Various kinds of scroll work, cutting jig-saw puzzles, patterns and other work it handles easily and up to full capacity. It takes blades for cutting metal... copper, aluminum and soft sheet iron as well as wood. Tension can be adjusted to accommodate from lightest to heaviest blades within the capacity of this machine. Best operating speed, 800 strokes per minute. Few saws at our low price have the quality features of the CRAFTSMAN 14-inch jig saw. You need it in your home or shop! Order the CRAFTSMAN today and learn for yourself how great a value it is! Complete with pulley for motor and 6 assorted saw blades. Without motor or belt.

99P93—Shpg. wt., 25 lbs. Not Prepaid. $9.50

SEARS, ROEBUCK AND CO.
POWER and SPEED for CRAFTSMAN 24-in. Jig Saw

Many Use—Low Priced Saw $19.50

-Height overall: 21 inches.
-Weight (less motor): 85 lbs.

Two Champions in the jig saw field ... 24-inch and 12-inch CRAFTSMAN Jig Saws. In flexibility of operation, selectivity of speeds, breadth of utility and in-born stamina they are unequalled. The perfect, balanced movement of all working parts, the smooth feeling of power, their keen effortless cutting—all appeal to the man who admires quality tools! CRAFTSMAN Jig Saws are suitable for the most delicate scroll work using the smallest fret saw blades, as well as work requiring saws up to ½ inch in width—in wood or metal. See 12-inch CRAFTSMAN, below.

Arm Removable ... Takes Saber Blades

On many jobs it is possible to remove the arm and thereby handle work of practically any size using saber saws. Necessary backing for the saw blade is provided by the roller guide attached under the table. The difference in blade tension between the fine and heavy saws is taken care of by a simple adjustment of a tensioning device in the head.

See the CRAFTSMAN Jig Saw in action carefully cutting out intricate designs, hogging its way through heavy stock, or cutting metal and you'll be convinced of its power and usefulness. Order TODAY! Shipped freight or express. Not Prepaid.

99P562—Jig Saw, 24-in. Throat, Complete, less Motor. Shpg. wt., 85 lbs ...................................... $19.50

99P561—Jig Saw with ¼ H.P. Heavy Duty Motor No. 99P498 described below. Shpg. wt., 115 lbs. $26.00

Fret Saw Attachment

For use with the CRAFTSMAN 24-inch and CRAFTSMAN 12-inch Jig Saws when very fine 5-in. fret saw blades are used. With instructions for attaching. Shpg. wt., 8 oz. 9P6826—Not Prepaid ......................... $2.00

1/4-H.P. Companion

CRAFTSMAN 12-in. Jig Saw

$16.50

COMPLETE

Without Motor

While the CRAFTSMAN 12-in. Jig Saw is made compact and handy for the shop with limited bench space, its capacity with arms removed is unlimited. Identical with the larger model 24-in. machine, except for short arms, it does the same work—runs with the same smooth powerful stroke, attains the same speeds, and is equally adapted to do sanding, saber sawing, and filing. It is designed to give perfect performance whether run from the countershaft or direct from a motor. Not Prepaid. Shipped freight or express.

99P574—Jig Saw, 12 inch Throat, Complete Less Motor. Shpg. wt., 60 lbs. ................................ $16.50

For POWER we recommend our ¼ H.P. COMPANION Motor, No. 99P498, described above.
1. Upper guide made from seamless steel tubing ground to exact size. Saw blades up to 14 in. length may be inserted through the upper end of this tube.
2. Spring return tension; readily adjustable for all classes of work.
3. A universal chuck takes blades up to $\frac{1}{2}$ in. width; sections round, square or angular are held firmly in hardened steel jaws.
4. Roller guides made from hardened tool steel with grooves for various types of blades. This guide revolves on hardened ground pins; an important feature is the fact that the guide may be readily attached to the under side of the table, when saber sawing with the upper arm removed. Also in some classes of work where it is necessary to see the whole design as in puzzle work, the hold down and upper guide may be entirely removed and the guide placed under the table.
5. Spring steel hold down prevents chatter and saw breakage. Positively will not mar or scratch soft materials.
6. A positive piston type blower built into every machine.
7. Cast iron table 10$\frac{1}{2}$ in. x 10$\frac{3}{4}$ in. accurately ground. Table tilts 45° right and left and 10° front and back. This feature is of greatest importance in die filing. Table has removable soft metal insert.
8. Tilting angle of table plainly indicated by graduated quadrant.
9. Main bearings bronze, automatically lubricated. Requires attention only once or twice a year.
10. Crank shaft perfectly balanced; crank pin tool steel hardened.
12. Base made of close grained cast iron with oil reservoir in the side.
14. Perfectly balanced 4 in. four-grooved driving pulley.
15. 1$\frac{3}{4}$ in. steel four-grooved driving pulley.
16. Extension arm cast iron. Readily removable for saber sawing, etc.

SEARS, ROEBUCK AND CO. PAGE 9
Sturdy 6-in. COMPANION
Bench Saw

Specifications
Depth of cut—1 1/2 inch.
Table—10 x 13 in.
Height—Overall, 8 inch.
Length—13 inches.
Speed—3500 R.P.M.

$4.50

ONE of the best built small circular saws you will find anywhere near our low price. With the addition of a saw guard and ripping fence at slight additional cost, you have a reliable, powerful and long wearing small saw, capable of cutting 1 1/2 inch material. The frame is very stiff and rigid and the blade furnished is a 6-in. combination rip and cross cut saw. Universal miter gauge is part of regular equipment. Saw mandrel carried in plain bronze bushed bearings. This is a simple, everyday, light production bench saw, and no provision is made for raising or lowering the blade, or for using dado cutters... It is an exceptional value for such a low price. Not Prepaid.

96P986—Shpg. wt., 20 lbs...........................................$4.50

COMPANION
7-INCH
Bench Saw
$9.50

Features
Depth of cut—2 1/2 in.
Table—10 x 14 in. Tilts to 45 degrees.
Height—Overall, 10 in.
Length—Overall, 19 in.
Speed—3500 R.P.M.

SIMPPLICITY, strength and convenience have been developed to a high degree in this economical saw. Raising and lowering of the saw as well as tilting of the table requires no wrenches or other tools, both operations instantly controlled by conveniently located hand wheels.

A short drive from arbor to idler pulley keeps the belt tension fixed while the saw is in any position. The new 7-inch combination circular saws bring greater capacity—any wood up to 2 1/4 inches thick may be ripped or cross cut. Table tilts to 45 degrees. Wood insert in table is easily removed for grooving, disc sanding or surface grinding.

The guard is a light weight alloy and remarkably efficient. It may be swung over, entirely out of the way, without detaching. An adjustable stop for the table is provided so that it may be tilted to an angle of 45 degrees as often as necessary without measuring the angle every time. The ripping fence—light but extremely rigid—is ingeniously designed and many angles can be cut without tilting table. Rear end of fence is graduated for quick, accurate setting.

9P6710—COMPANION Bench Saw. Complete as described above.
Shpg. wt., 30 lbs. Not Prepaid..........................$9.50
The COMPANION 8-inch Bench Saw...Built for Heavy Duty

A LARGE CAPACITY SAW at LOWER PRICE!
An Ideal Portable Outfit

A new heavy duty, fast-cutting saw for the carpenter, contractor, or home craftsman. Substantially built for daily production work.

It is equipped with a high grade combination 8-inch saw, which may be instantly raised or lowered by means of a conveniently located hand wheel—without the use of a single wrench or other tool. Famous Timken Tapered Roller Bearings insure efficient, frictionless performance over a long period of years.

Rips, Crosscuts Up To 2\(\frac{1}{4}\) Inch Stock

Heavy surface-ground table, 17x13\(\frac{3}{4}\) inches, tilts easily and quickly to 45 degrees. The ripping fence is extremely rugged and its unique design permits several angles to be cut without tilting the table. Rear end of fence is graduated so that it is quickly and accurately set at various angles.

Hardwood insert in table is readily removable for dadoing, grooving and disc sanding.
The guard is a light weight alloy and unusually effective. It raises as work is fed to the saw. Graduated mitre gauge. Motor base is slotted for belt adjustment.

Shipped freight or express. Not Prepaid.

10 TIMES FASTER than Hand Sawing!

CRAFTSMAN 8-INCH UNIVERSAL

This compact new design CRAFTSMAN Saw speeds up your work, cuts production costs... actually saws 10 times faster than by hand! Save yourself the drudgery and hours of time sawing by hand. Save money, too, on the low cost of the fully equipped CRAFTSMAN Saw. In the professional shop, it will soon pay for itself!

SPECIFICATIONS

- Depth of cut—Full 2¼ inches.
- Guard—Aluminum alloy, patented design; cannot be pushed into saw regardless of position of table.
- Table—15 in. x 18 in. Tilts to 45 degrees.
- Ripping Fence—20 in. long; semi-steel.
- Miter Gauge—Improved design; accurately graduated in degrees.
- Ball Bearings—Precision; sealed in oil for life of the machine.
- Height: Overall, 19 in. Length: Overall, 24½ in.
- Weight (Shipping) Saw Only—115 lbs.

Micrometer Accuracy—Quick Adjustments

Whether for the home craftsman or for professional production work, the CRAFTSMAN is the best 8-inch saw on the market anywhere near our low price! Smooth running, accurate, fast cutting—12 times faster than by hand—and with full equipment, the CRAFTSMAN is in a class by itself.

Consider these Quality Points: A newly designed guard which really protects you... it can’t be pushed into the saw with the table in any position! It swings on an improved bracket and can be lifted out of the way without being completely removed.

The saw table can be tilted to full 45 degrees and the angle is easily read on a clearly marked protractor gauge. (See view at right.) On it, reading can be made to one degree. In many instances, an experienced mechanic can adjust the table to ½ of one degree of the desired angle. Note the cam lever on the front of the saw frame, by means of which the table can be instantly locked in position for any desired angle.

Improved Ripping Fence

The ripping fence can be moved into position with one hand and is positive locking and aligning. It is of box-section, semi-steel construction, with long, wide finger adjustment held by a wedging action controlled by an eccentric lever located at the operating end of the table. Bearings are oversized type ball bearings, permanently sealed in oil. Bearings are located far enough apart to insure rigidity. The saw blade is full 8 inches in diameter and of CRAFTSMAN quality. It both rips and crosscuts. The saw blade can be raised and lowered, by means of a screw and toggle type mechanism. The depth of the cut... or the height of the blade above the table... is indicated on the very accurate protractor scale on the side of the saw frame. See view at right. A convenient hand wheel locks the saw in the desired position.

Stops Make Adjustments Easy

On the pulley side of the saw are located four stops, two at (A) and (D) in the view at right, keep the saw table square when it is being reset after having been tilted to cut angles. The stop at (C) is for preventing the saw from being raised high enough to allow the drive pulley to strike the underneath side of the saw table. The stop at (D) prevents lowering the saw too deep.

All parts of the CRAFTSMAN Saw which are turned or milled are cadmium plated to prevent rust. The table top is carefully machined to perfect smoothness and painted with a high grade aluminum paint. Saw frame is painted CRAFTSMAN Royal Blue. The motor rest is built in one piece with the saw frame. The CRAFTSMAN is the only saw with so many quality features. You need it in your shop. Order one today and learn for yourself what a value it is!

Equipment Included With Saw

The CRAFTSMAN 8-INCH Saw includes the equipment illustrated: saw guard and bracket, ripping fence, miter gauge, belt, motor pulley and wrench. With necessary bolts for mounting. Shpg. wt., without motor, 115 lbs. Shipped freight or express. Not Prepaid.

The COMPANION Bench Lathe

Has Quality Features at Much Lower Price

6-in. Swing. 24-in. Between Centers.

FEATURES

- 3 speed headstock.
- Bronze bearings, wick oiled.
- 5/8 in. steel spindle.
- Double-bearing headstock.
- Well ribbed, rigid bed.

Operates on 1/4 H.P. Motor

This lathe has a rigid well ribbed bed, and carefully machined parts. It is well suited to the needs of the home craftsman. It has three-speed "V" type cone pulley and can be driven from above, behind or below. The tailstock has a well operated, screw feed shaft with center. Spur center, 5 in. tool rest, and tool rest holder included. An accurately made, high quality lathe that will handle a wide variety of work in any shop.

99P597—COMPANION 6 in. x 24 in. lathe.

Shipping wt., 22 lbs. Not Prepaid. ....................... $4.50

The CRAFTSMAN Medium Duty

... Greater Capacity ... Heavier Construction

8-in. Swing. 30-in. Between Centers.

FEATURES

- 4 Speed headstock.
- Bronze bearings 9/16 in.
- Chrome vanadium spindle.
- Double-bearing headstock.
- Heavy well ribbed rigid bed.

Has Double Bearing Spindle!

This new 8 in. x 30 in. CRAFTSMAN Lathe is an example of the superior engineering displayed in our Craftsman line. The bed is of heavy semi-steel casting, well ribbed for strength and rigidity. All parts accurately machined and fitted. The headstock is designed for both inboard and outboard turning. Double supported chrome vanadium steel spindle runs in high grade bronze bearings.

The tailstock shaft is operated by a hand wheel and can be locked in any position. Drive is by 4 in. four step aluminum pulley. Can be driven from above, behind or below. Includes, spur center, 6 in. tool rest and holder, wrench, "V" belt and extra four step pulley for motor.

BALL BEARING

CRAFTSMAN BALL BEARING

* "In a recent shop test, this CRAFTSMAN 9-inch Lathe ran continuously day and night for 140 days, making over 1,000,000,000 revolutions without oiling and without attention of any kind! When taken down for inspection, the chrome vanadium steel spindle and ball bearings showed no appreciable wear."—W. P. Childs, Engineer.

FEATURES

—Headstock carries 5/8 in. chrome vanadium steel spindle, arranged to take attachments on both ends.
—Headstock has 4 step "V" type pulley face indexed in 60 accurate divisions.
—Spindle runs in ball bearings, sealed in oil for life of machine.
—Lathe bed of heavy semi-steel ribbed at intervals its entire length.
—"T" rest and holder quickly adjustable, of high grade semi-steel, accurately machined.
—Tail stock carries 5/8 in. chrome vanadium steel shaft; screw feed, operated by means of 4-in. hand wheel.

1/3 H. P.

FOR POWER

We recommend our 1/3 H.P. COMPANION motor No. 99P499, described on Page 30.

4 SPEEDS—Precision Built

One of the highest grade Wood Turning Lathes ever offered, a heavy duty machine with many features superior to much higher priced lathes. You'll find it just the size for a well equipped home work shop or for day in and day out production in the professional shop.

Its heavy, sturdy bed is carefully machined to hold headstock and tailstock in positive alignment. A big feature is the indexed pulley face and pin which permits accurate dividing of work. The spindle is arranged to take out board work and comes equipped with high grade spur center. A cup center is also furnished.

The "T" rest and holder are well made and quickly adjustable. Tailstock heavily built and accurately machined. Its shaft, like that in the headstock, is 5/8 in. diameter, made of chrome vanadium steel, accurately machined.

Lathe equipment furnished consists of cup and spur centers, "T" rest holder, one 4-in. and one 8-in. "T" rests, extra 4-step V-type cone shape motor pulley with 1/2-in. hole to fit 1/2-in. motor shaft, heavy "V" Belt and double end wrench. See page 36 for lathe accessories. Shipped freight or express.

99PM588—CRAFTSMAN 9 in. x 36 in. lathe. Complete as shown. Not Prepaid. Shpg. wt., 82 lbs................................. $19.50
Our Finest Wood Lathe
12-inch by 36-inch
CRAFTSMAN

A Heavy Duty Lathe With 6* Features!

- Headstock carries heavy hollow spindle of chrome vanadium steel, with 5/8 in. hole through its entire length and with No. 2 Morse tap. Spindle takes attachments on both ends.
- Headstock spindle runs in heavy duty ball bearings sealed in oil for life of machine.
- Headstock has 4-step "V" type cone pulley, face indexed in 60 accurate divisions.
- Lathe bed of heavy semi-steel, ribbed at close intervals its entire length.
- Tailstock carries heavy chrome vanadium steel shaft with self-ejecting center. Shaft, screw feed with 4 1/2 in. hand wheel, has No. 2 Morse taper.
- 3 1/2 in. and 9 in. dia. face plates with both right and left hand threads to fit either end of headstock spindle.

FOR POWER

1/3 H.P.

For Power, we recommend our 1/2 H.P. COMPANION motor shown on page 30.

A Popular Lathe for Any Size Shop!

Undoubtedly this lathe offers more all 'round usefulness, from the standpoint of either home craftsman or professional, than any other lathe on the market at anywhere near our low price!

A Real Production Tool

The CRAFTSMAN Heavy Duty lathe is a genuine shop production tool. It will handle the most difficult jobs within range of its generous capacity. Has massive ribbed bed, accurately machined, hollow headstock spindle and self-ejecting tailstock center. The divided pulley face is another of its 6 Star superior features.

All Oversize Bearings

Note the massive headstock unit with oversize heavy duty bearings and with spindle carrying both outward and inboard face plates. Its high grade chrome vanadium steel hollow spindle takes any variety of centers with No. 2 Morse taper. Centers are interchangeable with those on tailstock. The self-ejecting center is a great convenience when changing centers.

All machined surfaces are left bright and smooth; the lathe bed and other parts are in Royal Blue Lacquer. Lathe includes 3 1/2-in. and 9-in. face plates, 4-in. and 12-in. "T" rests, "T" rest holder, "V" Type 4-step cone motor pulley with 1/2-in. hole for motor shaft. Spur and cup centers with No. 2 Morse taper, double end wrench and "V" type belt. Shpg. wt., 97 lbs. Shipped freight or express.

ROSE TOOLS, INC.
COMPANION 9-In. Band Saw

Highest Grade Small Band Saw on the Market!

SPECIFICATIONS

Frame—Rigid; one-piece construction, semi-steel casting.
Wheels—Disc type, 9 in. dia., 1 in.
wide.
Table—10 x 10 in., semi-steel. Tilts to
45 degrees.
Saw—1/4 inch wide, 26 inches long.
Bearings—Oversize Bronze.
Capacity—Wood up to 4 in. thick.
Guides—Hardened steel revolving wheel,
bolt thrust.
Tensioner—Spring type.
Height—27 inches.
Weight—(Shpg. wt.) 65 lbs. Without motor.

Second only to CRAFTSMAN quality—the finest grade small band saw made. Semi-steel frame and table guards give complete protection exposing only the cutting edge of the saw. Guards in one piece, hinged to frame. Wheels well balanced and faced with highest grade rubber. The COMPANION is of very rigid construction well adapted to the small or large shop and easily portable. It is the lowest priced, high grade band saw on the American market. Shipped freight or express. Not Prepaid.

$11.50

Without Motor

Wider Range of Work with COMPANION 12-Inch Band Saw

SPECIFICATIONS

Frame—Solid, one-piece rigid construction.
Wheels—Disc type, reinforced with ribs, balanced, rubber-faced—1-in. width.
Table—Is 12 x 11 inches, surface ground, tilts to 45 degrees. Fitted with aluminum disc at point of saw travel to prevent damage to the blade. Has adjustable stop screw for quick tilting.
Bearings—Oversize Bronze, with grease reservoir and turn-down grease cups.
Capacity—Wood up to 6 inches thick.
Guides—Hardened steel revolving discs receive saw thrust. Guides top and bottom.
Tensioner—Enclosed spring type, governs alignment and adjustment of wheels.
Height—34 inches over all.
Weight—(Shipping) 82 lbs. without motor.

Fully Guaranteed

The COMPANION 12-inch Band Saw will add much to the small shop. Analyze it from every point. Compare it, as a complete unit or part by part with any other. Test the table and frame for rigidity, the oversize bearings for fit, the wheels for strength. Note that guards are included in the low price. And remember that this COMPANION Band Saw is fully guaranteed. We recommend our COMPANION 1/2 H.P. Motor No. 99P498 for operating the COMPANION 12-inch Band Saw.

With all its sturdy strength and rigidity, this band saw weighs but 72 lbs. and is easily transported right to the work—a great advantage and a distinct saving to the carpenter and contractor. Viewed from every point, the COMPANION Band Saw is an achievement of engineering and manufacturing skill.

Shipped freight or express, Not Prepaid. Shipping weight, 82 lbs.

SPECIFICATIONS
Frame—All one-piece solid construction of semi-steel well trussed bridge type rigid construction.
Wheels—Streamline spoke wheels of semi-steel, in balance both at rest and while running... runs smoothly; vibrationless. With ground rubber faces.
Guards—Saw enclosed except for working portion.
Table—12 in. x 12 in. of semi-steel, with protractor scale for tilting; tilts from horizontal to full 45 degrees. Has combination miter gauge and ripping fence for cutting any angle from 0 to 90 degrees.
Bearings—Olive, with ball bearings sealed in oil for life of machine.
Capacity—Any thickness of wood up to 3/4 in.
Guides—Hardened steel; spinner type. Thrust of band saw carried on steel ball bearing. Guides, top and bottom.
Tension—Positive screw type; keeps wheels in accurate alignment.
Height—34 inches overall.
Weight—(Shipping) 122 lbs., without motor.

Dynamically Balanced—Fully Adjustable

We put it up to our engineers to design just the best band saw possible to build. They went at the problem with full information on every band saw made. They took the best features of all and improved upon them in a new and better designed saw, one that runs with least friction, is dynamically balanced and is practically vibrationless... our great CRAFTSMAN 12-inch Band Saw!

Easy to Operate

The CRAFTSMAN is easy to operate. The table tilts and can be locked at any desired angle from horizontal to 45 degrees by means of a cam and lever lock. The angle of tilt is registered on a protractor scale. Two stops make it easy to bring the table back to level after tilting.

The saw guide above the table is of ball thrust spinner type, the spinner shaft having a bearing 1 1/2 in. long; assures perfect alignment and a freely turning spinner wheel. Hardened steel guide pins adjustable in all directions. The saw guards are hinged to the frame and cover the saw except for the working part. The CRAFTSMAN takes any band saw from 3/8 in. to 3/4 in. width.

Compare It with Others

Whether your shop is large or small, you need the CRAFTSMAN 12-inch Band Saw for all around work. Compare its quality point by point with band saws elsewhere... you'll never know what real band saw satisfaction is until you have tried our CRAFTSMAN. Send your order today!

Newest Design... CRAFTSMAN
10-INCH SHAPER

- Overall Height 10 3/4 in.
- Diameter of table, 10 in.
- Speed, 9,000 R.P.M. giving 27,000 cuts per minute.
- Chrome vanadium steel spindle has vertical and lowering cutter head; has left hand thread and nut.
- Heavy duty ball bearings, sealed in oil.
- Combination fence and guard, included.

Safe - Strong - Speedy

The shaper adds the artistic touch to woodwork... puts the mark of master craftsman on the straight, simple lines of the CRAFTSMAN's work and makes it beautiful... The CRAFTSMAN takes a variety of cutters, such as jointer, coping, router, fluting or carving. In construction, it combines the most advanced ideas in design with tried and proven engineering methods to bring you a sturdy, strong machine. The vertical spindle runs true, the table too is accurately machined. Note the combination guard and fence, with slotted bolt holes for easy adjustment. Spindle pulley has proper clearance in column of shaper. Outfit includes: one cutter, combination guard and fence, 3/4 in. to 3/4 in. adapter sleeves, endless "V" belt, 5 in. diam., motor pulley and two wrenches. See listing at right for other cutter heads. Shpg. wt., 28 lbs.

- Belt sander table, 13½ in. x 4½ in.
- Disc sander table, 9¾ in. x 6 in.
- Disc sander, 8 in. diameter.
- Weight (shipping) without motor, 38 lbs.

For Power, we recommend our COMPANION ½ H.P., 110 Volt, 60 Cycle A.C. double shaft motor No. 99P499, shown on page 30.

The view above shows disc sander set at angle; lever adjustment for belt sander, pulley and guard.

Makes Fast Work of Difficult Jobs

Our combination belt and disc sander is without doubt one of the best and lowest priced machines on the market. We have incorporated in it all the refinements and features of the larger and more expensive machines.

The frame is of semi-steel carefully machined. Large bronze bearings carry the shaft on which are mounted the sander disc and the drive pulley for the sander belt. The disc sander plate is 8 in. in diameter, made of aluminum and accurately machined to proper size and balance. It has a coarse sanding disc included.

The disc sanding table is universally adjustable, tilting from horizontal to 45 degrees, and has an accurately divided miter gauge. Table can be locked in any desired position by means of a cam and lever lock. The sander comes equipped for wood finishing, but with proper disc and belt can be used for metal also.

The CRAFTSMAN is suitable for any size shop and handles a variety of work in an efficient manner. Order it TODAY!

SEARS, ROEBUCK AND CO.

PAGE 21
Even the Small Shop Needs

Individually Shop Tested at Factory

Drilling, inlaying, shaping, mortising, tenoning and dovetailing are all important woodworking operations that are efficiently performed on this high speed drill press. No small drill press can do the job faster or more accurately than the COMPANION!

Mechanically correct, skillfully designed and carefully fitted to close tolerances, the COMPANION is capable of delivering top-notch performance on daily production work.

Special oilless bronze bearings will sustain speeds upwards of 7000 R.P.M. To make doubly sure of every machine getting to our customers in perfect shape, we have them individually assembled, run and thoroughly tested at the factory.

Many Uses of the COMPANION Drill Press

Drilling—Built for heavy continuous drilling up to and including 1/4-in. holes. Stop collar, spindle clamping bolt and many other features indispensable to rapid, accurate work are included.

Inlaying—Routing out wood for inlaying is a simple, effective job. A few hours' experience and you turn out work comparable to that done by skilled artisans working with hand tools.

Shaping—Attractive mouldings and decorative edges on table tops ordinarily require a separate expensive machine but are easily made with the COMPANION drill press. Cutters providing more than 20 shapes are available.

Mortising—The wood to be mortised is fed between two guides clamped to the table top. The spindle is lowered to cut about 1/8 in. of stock locked there, and the work moved until the required length is obtained. Repeating the cut, 1/8 in. at a time, quickly gives the required depth.

Tenoning—This is done with the router bits. A saw cut, to the depth desired, is made at correct distance from end of stock. The wood between the saw cut and end of stock is then removed with the routers.

Dovetailing—Dovetail joints are so desirable because of their strength and permanency.

SEARS, ROEBUCK AND CO. PAGE 23
Hollow Chisel Mortising

It is easy to form Mortises with perfectly square ends using the hollow chisel mortiser with the CRAFTSMAN Drill Press. Attachments illustrated at left.

Mortising Attachments with Collet Chucks.

9P6803—For 563 Drill Press. Shpg. wt., 2 lbs. 8 ozs. Not Prepaid $2.25
9P6824—For 512 Drill Press. Shpg. wt., 2 lbs. 8 ozs. Not PrepaID $1.75
9P6806—Hollow Chisel (not shown), Sizes, 3/4 in., 1/2 in., and 1/4 in, State size. Shpg. wt., 3 ozs. Each Not Prepaid $1.00

Dovetailing

The attachment at left will enable you to make dovetail joints accurately. Skill is unnecessary to form perfect joints, as corners of the pieces to be joined are attached temporarily and both numbers are cut at the same time.

Attachment consists of steel comb, with slots spaced to permit shank of route to enter and cut to a set depth.

9P6802—Set of Dovetail attachments complete with 1/2 in. dovetail routes. Shpg. wt., 2 lbs. Not Prepaid $3.50

Carving

Beautiful work can be done with little or no practice on the CRAFTSMAN Drill Press. Using a pattern cut from plywood, as a guide the work is moved under the cutter set to depths until all the necessary material is removed. Best carving speed 3000 R.P.M. For cutters of various sizes and shapes, see page 22.

Shaping

An excellent, high speed spindle shaper is obtained by inverting the head bracket and motor assembly, slipping it down the column, and placing the extension table over it. Very efficient for shaping mouldings and small pieces. For cutters of various shapes, see page 22.

9P6533—Extension table for spindle shaper, with guard. 14 in. x 16 in. Shpg. wt., 18 lbs. Not Prepaid $3.90

For Power

For all general purpose work, such as drilling, mortising, etc., we recommend our 1/3 H.P. COMPANION Motor, No. 99P499, described on page 30.

For dovetailing, shaping and routing, we recommend our 3/8 H.P. CRAFTSMAN Motor, No. 20P2317/4, described on page 30.

20 SPECIAL

1—Motor an independent unit. Easily removed.
2—VEE Belt direct drive; gives maximum power.
3—Body of Drill head close grained grey iron, accurately machined.

20—Quick belt adjustment.

7 SPEEDS Available

Four speeds—600, 1250, 2400 and 5000 R.P.M. are available with the set up shown, including a 1750 R.P.M. motor. Three more—785, 1750, and 3900 R.P.M. are obtained by raising the motor on its bracket the distance of one pulley groove, and readjusting belt. (If 3500 R.P.M. Motor is used the above speeds are doubled.)

Size of Drill

Height—Overall 36 1/2 in.
Maximum Distance—Column to spindle, 8 1/2 in.
Maximum Distance—Spindle to base, 16 in.
Table Size—9 in. x 8 in.
Weight—(With motor) 95 lbs.
Polishing, Grinding and Buffing...

$269 COMPLETE 7-Piece Outfit

With its numerous accessories, this outfit is handy for sharpening tools, removing rust and paint, grinding and polishing metals and drilling.

Included in set are the polishing head—height, overall, 6 inches—with spindle, pulley, ¼ in. chuck and clamping collars; 4 x ½-inch vitrified grinding wheel, 4-inch coarse and fine wire wheels, 5-ft. leather belt, 6-inch cloth buffers and cake of buffing compound.

9P6931—Complete Polishing Set. Shpg. wt., 4 lbs. 8 oz. Not Prepaid...... $2.69

COMPANION No. 2 Polishing Head

A sturdy, well built head, 8 in. high overall, with bronze bearings and ½-in. spindle. Equipped with “V” Type pulley and ¾-in. chuck; designed to accommodate wheels on either end up to ¾ in. thick. Can be driven from above, behind, or below. With clamping collars for attaching wheels.

9P5892—Shpg. wt., 5 lbs. Not Prepaid..... $2.65

COMPANION 4-In. BENCH GRINDER

A sturdy, dependable Bench Grinder at an exceptionally low price. Bearings are ¾-inch in diameter. Stand is close-grained gray iron, very strong. Two 4 x ½-inch grinding wheels with adjustable tool rests. May be driven from above, below or behind. Shipping weight, 6 lbs. 12 oz. V-belt drive. Not Prepaid.

9P6536—Complete as shown.......................... $1.95

COMPANION 6-Inch GRINDER

$4.50

—Two 6-inch grinding wheels, fine and coarse.
—High Grade Bronze Bearings.
—Speed, 1750 to 3500 R. P. M.

A Heavy Duty Bench Grinder, built to stand up and deliver on daily production work, yet priced so reasonably that every craftsman will want one. Bearings are bronze-bushed, ¾ in. in diameter. Spindle is turned down to ¼ in. diameter at ends to take all standard accessories. Adjustable tool rests and guards are ingeniously arranged so that they work effectively with both 4-inch and 6-inch diameter wheels.

This grinder is so designed that it can be driven from below, behind or above, with a “V” belt; round or flat belt may be used by changing pulleys. A 1¾-in. “V” pulley is furnished as regular equipment.

9P6696—Complete as shown. Shpg. wt., 15 lbs. Not Prepaid.................. $4.50

SEARS, ROEBUCK AND CO.

PAGE 27
FAMOUS... High FLEXIBLE FEATURES

- Precision type ball bearings—two rows in each end of shaft, reduce frictions, eliminate over-heating and increase power delivered to tools.
- Core—built up of fine grade, selected steel music wire, wound in alternate layers. Machined steel ends are securely swaged.
- Casing—soft steel, tightly assembled to prevent grease leakage. Solid brass ferrules attached at each end.
- Hand Piece—has short spindle running on two rows of ball bearings. Housing of hand piece screwed to casing. Spindle attached to core.
- Adapter—provided to take accessories having 1/2-in hole.

POLISHING, drilling, sanding, grinding, paint removing—There are a thousand and one such jobs which you can do better, faster, and more economically with our flexible shaft outfits. They are so readily portable, can be used around corners, overhead, into hard-to-reach, out of the way places. And they do a real job because they are speedy and powerful. They save you time and energy—our low price saves you more money! Not Prepaid.

Needed in Every Home Shop or Plant

This outfit handles any job large or small. Power is transmitted through a flexible shaft with all the speed and smoothness of a short, rigid shaft. It is of highest quality throughout, tested to withstand enormous overload. Fully guaranteed. Order this outfit TODAY and see how much satisfaction it will bring you!

MULTI-DUTY HIGH SPEED

$17.70

WITH MOTOR

WE realize that to succeed in popularizing one of the most ancient arts, wood carving, and to make it possible for even the novice, the tools themselves must be priced so that the average home craftsman can afford to own them. This High Speed flexible shaft in no way replaces No. 99PS504, above. Each has its place. The 99PS504 is for comparatively slow speed work where the revolutions required are from 1800 to 3600 R.P.M. The shaft at left is a high speed tool operating at speeds ranging from 5000 to 12,000 R.P.M.

Easy To Operate

While to the home craftsman its principal appeal is for wood carving, drilling and etching glass and different kinds of metal, it is also extensively used by die, pattern, and tool makers.

There is no more fascinating work than wood carving, especially when it is made possible for even the amateur to do a presentable job on his first attempt.
Quality ... MULTI-DUTY SHAFT

We Recommend The COMPANION for Use with POWER TOOLS

Heavy Duty Double Shaft 1/2 H.P. $9.95

- Precision Type ball bearings.
- Lifetime starting switch... withstands over 500,000 starts.
- Windings guaranteed moisture-proof.
- Forced air cooling.
- Splash-proof end plates.
- Accessible terminal, reversing box.
- 10-ft. cord and plug. 2-in. pulley.
- Slotted base for belt tightening.

Cool, smooth, quiet running, with loads of excess power. A very popular motor for running tools such as drill presses, grinders, lathes, planers and saws. Also runs small feed mills, sign flashers, small air compressors, etc. The grease-packed ball bearings insure trouble-free, continuous service.

Machined 1/2-inch double steel shaft with 2-inch grooved pulley on one end. Base holes measure 3 3/4 in. across, and 5 in. from brace to brace. 1/2 inch pulley shaft. Speed, 1750 R.P.M. 10 feet of cord, plug and pulley included. For 110 to 120-volt, 60-cycle alternating current. Shipping weight, 32 lbs.

99P499—1/2 H.P. Not Prepaid $9.95

The COMPANION 1/2 H.P. Repulsion-Induction Motor

-Won't dim lights nor use as much current as average electric iron.
-Precision type ball bearings.
-Improved starting switch, withstands 500,000 starts.
-Splash-proof end plates.
-Slotted base for belt tightening.
-Develops maximum power at 3500 R.P.M.

Specially designed and built for use with CRAFTSMAN and COMPANION Power Tools. It is of the repulsion-induction type with specially compensated windings and uses less current than the average electric iron. A high power, high speed motor power that is most suitable for wood working power machines. Ball bearings insure minimum friction and permits motor to be operated with shafts in vertical or horizontal position. Complete with cord and plug. For any 110 to 120 volt, 60 cycle A.C. current.

99P582—COMPANION 1/2 H.P. Motor, Not Prepaid $17.50

Light Weight, Perfect Balance, Power in This
CRAFTSMAN 6-INCH ELECTRIC HAND SAW...

$36.50 Cash

On Easy Payments $7.50 Down $5.50 A Month

FEATURES
- Depth of Cut—1 1/8 in.
- Blade Diam.—6 in.
- Weight—8 lbs.
- Length, overall—13 3/4 in.
- Height, overall—7 1/2 in.
- Bearings—Chrome steel Ball Bearings.
- Gear—Nickel steel worm and bronze alloy gear wheel.
- Motor—Universal, A.C. or D.C. 110 V., 60 cycle.

The CRAFTSMAN is a light duty electric hand saw, designed for ripping or cross cutting 1-inch lumber. Also crosscutting 2-inch dressed lumber. Because of its light weight (only 8 lb), comfortable balance, compact design and power, it is popular with home craftsmen, carpenters and for all kinds of building, repair and maintenance work.

Note These Refinements
- Table—quickly movable up and down, without changing convenient operating angle of tool, to regulate cut from 0 in. to 1 1/8 in. Safety guard—covers exposed parts of saw blade when not engaged in wood. Trigger switch—safe quick make and break type, thumb operated. Saw handle—with comfortable grip, and auxiliary bakelite knob on top give nice balance... make saw easier to operate. Saw blade—quickly removed without changing position of table.

Jack Shaft Stand

This assembly provides a handy jack shaft set up for increasing or reducing speeds. It is especially useful for increasing the drill press speed for routing and shaping operations. Bolt holes in base are placed identically with those of motor and may be interconnected. Not Prepaid. Shpg. wt., 8 lbs.

9P6885—Jack Shaft Stand $2.50
for **BUFFING, POLISHING and SANDING**

**COMPANION Ball Bearing Flexible Shaft**

$4.50

You can use the COMPANION flexible shaft and attachments with any electric motor with 1/4-inch shaft. With the attachments below, you can accomplish innumerable jobs of buffing, polishing, sanding and cutting. High speed ball bearings, two rows in each end. Core built up of selected music wire wound in alternating layers. Machined steel ends. Casing, soft steel; won't leak grease. Outfit includes 5/8-inch three-jaw chuck, chuck adapter and improved motor coupling. Length overall, 42 inches. Two or more may be coupled for longer lengths.

9P5334—Shpt. wt., 2 lbs. Not Prepaid

for Perfect Motor Mounting ...

COMPANION Motor Rails

Floating Type

Designed for use on nearly all sizes of fractional horse power motors. They permit the motor to be so mounted as to automatically keep the proper belt tension. By buying additional motor rail clips one motor can be quickly moved from one position to another to drive several different machines. This gives individual motor drive with only one motor required. Necessary bolts and screws for attaching included. Shpg. wt., 2 lbs. Postpaid if part of $2.00 order.

9F6894—Floating Motor Rail ... 50c

Floating Motor Rail Clips

These clips are for use in connection with Floating Motor Rail No. 9F6894, described above. Shpg. wt., 5 ozs.

9F6899—Pair ... 20c

Adjusting Type

These Rails permit greater freedom of movements of motor when making belt adjustments. Every make of motor, of one H.P. and less, will fit these semi-steel rails, as they may be located at any required distance apart. With necessary bolts and screws for attaching.

9F6897—Motor adjusting Rails. Shpg. wt., 2 lbs. 9 oz. Not Prepaid. Per Pair ... 50c
